Art Unit: 2825

## **DETAILED ACTION**

This is a response to the communication filed on 09/19/2003 through 12/12/2003. Claims 1-12 are pending.

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2, and 12, drawn to a method of delay change determination/ aligning aggressor signals associating with nominal and noisy victim net signal transition arrival time/waveforms, classified in class 716, subclass 06.
  - II. Claims 3-6, drawn to a method of determining aggressor-induced delay change with voltage dependent current model and interconnect model, classified in class 703, subclass 19.
  - III. Claims 7-11, drawn to a method of determining aggressor-induced delay change with using a computational model and pre-computed aggressor waveform, classified in class 703, subclass 02.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions listed as groups I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. In the instant case, inventions I-III have separate utility. Invention I uses a method of delay change determination/ aligning aggressor signals associating with nominal and noisy victim net signal transition arrival time/waveforms, Invention II uses the a method of determining aggressor-induced delay change with voltage dependent current model and interconnect model, and invention III uses a method of determining aggressor-induced delay change with using a computational model and pre-computed aggressor waveform. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I – III is distinct, restriction for examination purposes as indicated is proper.

Art Unit: 2825

3. A telephone call was made to Stephen Durant (31,506) on November 18, 2005, to request an oral election to the above restriction requirement but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

## Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuyen To whose telephone number is (571) 272-8319. The examiner can normally be reached on 9:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Smith can be reached on (571) 272-1907. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
